COBALT BOATS

R30

*R30*

## We made its function. You make its fun.

All with a touch of class and style.

The Cobalt R30 – a luxurious open-bow day boat designed with “Free Space Reclamation”, Cobalt’s exclusive technique for cockpit maximization.

Elegant and expansive seating options combine with its endless storage spaces to enhance the experiences of legendary Cobalt ride. The largest of the BR Series, the R30 also features an electric actuated swim step that lowers to just below the water’s surface. Also astern, find a beach of a sunpad – large enough for four sun worshipers. And when it comes time to gather around for some good fun and conversation, make useful our convertible layout in the cockpit. Lounge the seats forward or aft, gather around the teak-adorned cockpit table or covert the area into a couch oasis with filler cushions. The port side features a head compartment that doubles as a changing room.

At the helm, the captain will find the glass cockpit design provides a birds-eye-view for a safe and enjoyable day on the water – equipped with Garmin screens that keep your systems and route in view at all times. We cannot forget about the available joystick control with its easy maneuverability and simple operation. That’s right – easy and simple – all with a touch of class and style.

The Cobalt R30.

## Only A Cobalt.

America's Boat-Building Experts.

There's really nothing quite like a Cobalt. Since its first day on the water over 50 years ago, only a Cobalt has inspired a sense of ownership synonymous with accomplishment. With a reputation earned over the years as America's boat-building experts, Cobalt's commitment to standard-setting performance and luxury continues to make it much more than just a purchase – it's a destination. From the moment you know you want one to the moment you finally own one, nothing should compromise your life's pursuit. Only a Cobalt – three words poised to define the next generation of boat owners

The best made boats in America. It's been said the best boat builders you can find anywhere, are found in Neodesha, Kansas. This is where you'll find real boat people. Passionate boat people who understand how hard their customers have worked to have the very best. Yes, you'll find them here, square in the middle of this great country. Only here can be found the unique combination of innovation, craftsmanship, passion and values that can deliver on Cobalt's promise - to Compromise Nothing in delivering to its customers the absolute best boat in America.

## A Step Ahead.

Customer Inspired Innovation.

Cobalt's reputation for innovation is grounded in its commitment to stay a step ahead of what the most discerning boaters demand.

From a relationship like no other – owners and their boats – comes innovation like no other. It's the promise each Cobalt boat makes to its owner. The same promise Cobalt has made, to bring unsurpassed innovative functionality to the boating marketplace.

**Always copied, never outdone.** With this proven reputation in design and engineering innovation, it's no surprise that time and time again, other boat manufacturers have seen fit to copy the thoughtful design and functionality that have always defined a Cobalt boat.

- The Cobalt Splash & Stow system of the A29 for handling and storing large yacht-style inflatables
- A Cobalt first: the integrated bow eye with a scuff plate for protection from trailer marks
- Stainless steel adjustable poles to secure and tighten bimini tops with our innovative build-in turnbuckle – no fabric straps here
- Flip-lip seat bolster – the ability to sit higher, with unobstructed views above the windshield
- **Brand New!** Patent pending E-Step Electronically Powered Swim Step. At push of a button, the step folds into the water or returns from the water to the stowed position
- **Brand New!** The Surf Gate™ wave is the best on the water from cleanliness, push and height of wave.

## Meaningful. Memorable.

Finely Detailed Interiors.

As the best made boat on the market, there are plenty of attributes to point to as being *definitely* Cobalt. That said, ask a Cobalt owner what stands out about their boat, and you're likely to hear, "Oh, the details!"

Just glance at any Cobalt cockpit to witness the full effect of a Cobalt interior – straight, smooth, uniform and unmatched attention to detail – and the warmth and feel of premium materials throughout.

Moving to the helm - where strength meets style – rock-solid fiberglass substructure rides beneath upholstered good looks. The Cobalt Glass Cockpit touch-screens offer a level of control and information borrowed from aircraft designers. Stainless steel switch mechanisms are firm, sure and sturdy.

Butter-soft and bull-strong, Cobalt upholstery is as tactile as they are easy on the eye. Always double-fastened with both adhesives and staples, and stitched with meticulous precision. Underfoot, the carpet, Seagrass flooring or Sof-Trac marine mats are rubber-backed, backed again with skid-resistant, no-flex composite flooring under all.

### Notable Meaningful and Memorable Interior Details

- Cobalt Glass Cockpit with touch screen displays
- Aircraft-inspired stainless switches
- Precision-sewn interior details
- Seats that convert to a sun lounge
- Deep bow and cockpit seating
- Hand-crafted helm with detailed, quilted, double-stitching
- Fresco Chil Vinyl on darker interior colors that stays 15 to 20 degrees cooler than traditional vinyls

## The Making of a Legendary Ride.

Exceptional Construction.

The famous Cobalt hull means handwork, with every layer rolled by skilled craftspeople. Extensive number of layers on the hull bottom, overlapped at the keel to double the number of layers. Reinforced with Kevlar and then strengthened further with Spraycore, the hull's structure hardens into the critical component of the legendary Cobalt ride.

Because the quality of the mold depends on the quality of the finish, hand-waxing follows after every other part. Old finishes are reworked after every ten parts, and no unsightly marks are left behind. Finally, every Cobalt hull cures in the mold, well beyond normal industry standards, ensuring integrity, flexible strength and year-to-year dependability. Curing longer in the mold also gives a better mirror-like finish by reducing any distortion from the heat created during the chemical reaction of curing.

Cobalt longevity is obvious to all who know the brand. Some of the reasons for this might not be so obvious. Invisible composites – light and strong – compose every Cobalt transom. No wood in the transom, and no wood either in the polypropylene structural honeycomb of the floor. Also no wood in the water-impervious seat bases, nor in the all-fiberglass stringer grid where a methacrylate bonding compound adds lifelong permanence.

- Z-Thane strengthening, protective barrier coat in the hull.
- Completely hand-laid hulls, reinforced with Kevlar™ at the keel.
- Hand-lamination, with extensive number of alternating fiberglass mat and woven roving layers, and double thickness overlap at the keel.
- Honeycomb composite floor – rot proof strength with improved sound and vibration dampening. Composite construction of stringer grid and all structural components.
- Exceptional stainless steel hardware, over-sized and strong.
- Deep and strong graphics in the gelcoat.
- Integrated bow eye with a scuff-plate for added protection.
