

COBALT BOATS

CS23 SURF

Cobalt surfing perfection.

Without compromise.

Until now, wake surfing boats have come with a compromise to ride comfort, performance, and low speed maneuverability. That was before Cobalt SURF merged the award-winning Cobalt ride with enormous wake making capabilities. Perfectly executed. And without compromise.

Cobalt SURF combines a proven deep-v hull design and performance advantages of a stern drive, with a world class wake maker thanks to our SURF control system – which quickly and automatically tunes the boat's attitude and speed to the optimal SURF configuration – on either side of the boat. A fully customizable wake that provides smooth transitions, a wide push zone, and a solid pop to exceed the riders' demands.

SURFING MADE SIMPLE

With the touch of a button Cobalt's computer control surf system adjusts to create the optimum surf wake either left or right. No need to transfer ballast load between tanks to achieve optimum surf wake.

- ④ Fill ballast tanks
- ④ Set GPS directed cruise control to desired speed
- ④ Select surf control left or right
- ④ Throttle up and surf

ON PLANE WITH FULL BALLAST

In Performance Mode the surf tabs automatically deploy and adjust for a quick hole-shot through to running speed, easily getting the boat on plane with full ballast. No need to empty tanks for a quick run at speed.

PERFORMANCE OF TOTAL TRIM CONTROL

Exceptional wake surfing doesn't come at a compromise to Cobalt's softer, drier, faster ride. With the versatility of full-range power trim all the control and efficient operation remains. Drivers can easily customize the wake for surfing, wakeboarding or smooth cruising.

VOLVO PENTA FORWARD DRIVE

Uniquely engineered with two forward-facing counter-rotating props that pull the boat through the water rather than pushing it, Forward Drive gives small-craft leisure boaters new found versatility. Whether wakesurfing, wakeboarding or simply cruising, Forward Drive allows boaters to enjoy endless days of fun without sacrifice. Armed with power trim and an enlarged trim plate, drivers can easily customize their wake for watersports, then level off for smooth cruising.
