

COBALT BOATS  
*Beyond*

*2006*

“EVERYONE IS GOING TO HAVE THEIR OWN IDEAS. THEREFORE, WE MUST WORK AS A TEAM TO POOL AND INCORPORATE ALL IDEAS INTO ONE FINAL DECISION.”

*Fred Z. Forslund*

He was an artist and a photographer. He was a graphic designer, the man who -- more than any other -- gave this company the printed look and feel we advertise to this day. He was a teacher in every sense of the job, a mentor and friend who blessed everything he touched. We called him “Fred Z.”

He wasn't your ordinary Fred. That trailing letter suggested strongly that his thoughts went elsewhere, beyond what the rest of us were wishing and considering. But our Fred was humble and happily unaware of the reach and heft of his talent. He was one of us.

He set some standards. Standards that, we trust, will always guide our discussion, our marketing of these boats: honest, straightforward, knowing that greatness lies in team-play, in doing little things well day after day.

So long may you run, old friend. That zig-zag Z following you all the way to an eternity awash in family and friends who won't ever forget.

COBALT

COBALT

# Beyond BOAT BUILDING

FOR CENTURIES THE HORIZON HAS SERVED AS A WORKABLE METAPHOR FOR THE POSSIBLE.

*"My job is a piece of cake. Because I work with friends, with people I trust, I know that the job is going to be done right, that we're going to build the best possible boat. And, you know, what I*

*appreciate most about Cobalt is that a young person who's been on the job maybe 30 days, that kid can say, "Hey, we can do this even better." Every one of us has a voice."*

*Mark Blanck,  
21 years at Cobalt,  
Lead in Large Boat Construction*

The convergence of sea and sky imposes a distant limit to our vision, and that arcing line twelve miles away on a wide-open ocean shows us the farthest visible point toward which we might wish.

For thirty-eight years now, Cobalt boats have set a course for exploration of what might be. What might be the most idyllic afternoon ever spent with one's family? What might be the exact level of controlled adrenalin to be felt behind a perfect wake at thirty knots? What might be the can't-say-no setting for a midnight proposal of marriage? In ten thousand waterborne interactions of people who care about each other, a weekend takes shape. And children remember and grandparents smile in the knowledge of lives made impossibly rich by nothing more than often, easy togetherness.

Meanwhile.

Back in Neodesha, Kansas overwhelming questions bounce in the minds of the dreamers who design, engineer, and build Cobalt boats: "What's next?" "What waits just past what I can't right now define?" "What lies beyond the true but the already tried?" In the four steps of the scientific method, in conjecture and trial, in the random thoughts of an idle hour . . . well . . . who can say when the inspiration will come?

The next big idea.

The conceptual basis for a boat such as no one has ever before imagined. A boat that will cruise beyond the expected and the easily advertised. A boat ready to be called, again, a Cobalt.

For almost forty years those big ideas have emerged at critical intersections in this company's growth and diversification, enabling Cobalt to again and again anticipate the needs and wishes of ever more sophisticated boaters. This model year, we'll introduce you to two spectacular new boats that, we trust, will extend the Cobalt reputation for innovation and meticulous execution. The 232 and 323 will cruise in the vanguard of this year's excursion into the not-yet-fully known.

Read, please. Take on the Cobalt collection for 2006. Meet the remarkable people who bring you these boats. Discover the technology that supports them, and know once more their small-town common sense, the homegrown ethic that supports this technology.

Look. Right here.

Just past the city limits of Neodesha, out toward where a prairie sky meets an ancient sea.

# Beyond DEFINITION

A boat's identity begins with the hull. Where the big water slaps hard, when the waves pound like asphalt, the hull defines the boat. The hull decides, finally, a boat's true and lasting quality, its ultimate value. Over the years, Cobalt engineers have designed and Cobalt craftspeople have built hulls known throughout the industry for control, stability, and responsiveness. Time and again, knowledgeable boaters have chosen Cobalt boats' unmistakable ease of handling, their willingness to perform exactly as asked, their matchless ability to deliver the easiest of cruises in the roughest of waters. Such effortless multitasking arises from critical elements of a Cobalt hull's design and construction. Elements that speak to a new, a relaxed and relaxing meaning of "ride."

*"On the job I believe in two things: attitude and teamwork. Each of us has to understand that everybody's job is important. My job is just a little piece of one big whole, but by doing my job to the best of my ability, I make everyone else's job easier. And, together, we build a better boat."*

*Alan Beckwith,  
28 years at Cobalt,  
Crew Leader in Lamination*

## TOOLING

The quality of any hull simply may not exceed the quality of the tooling, the molds that produced it. Mold maintenance is not a sometime task at Cobalt; we maintain and refine tooling on a daily basis.

## EXTENDED RUNNING SURFACE

Perhaps the most imitated component of performance in the boating industry, Cobalt's extended running surface brings more of the hull into direct, hugging contact with the water at cruising speeds. The results: quicker planing, firm and true turns, minimized bow-rise, and greater lift at the stern. And day long comfort that must be felt to be believed.

## REVERSED CHINES AND DEEP V'S

The chines are longitudinal members of the hull and, in Cobalt design, they compound the benefits of the running surface. Reversed chines deflect spray downward, producing a drier boat, with better tracking and even more control in sharp turns. Meanwhile, the Cobalt deep-V hull hauls along quietly, as Cobalt engineering meets the chop in the safest, most stable hull on the water.

## COMPOSITE TRANSOM

Water is no friend to internal structure, and moisture's most sinister point-of-attack comes at the transom, with all its loads and pressures, absorbing all the torque of the drive system. Where other manufacturers are content to use wood at the transom, Cobalt insists on all-composite construction. At two-plus inches of thickness, Cobalt transoms isolate noise and vibration, while ensuring the boat's integrity and longevity.

## FIBERGLASS STRINGERS

Strong, solid, wide, and woodless, Cobalt stringers ensure a solid, solid ride. Bonded to the hull with Plexus (a high-tech bonding compound), these stringers have much to say in Cobalt's decade-long warranty on the hull.

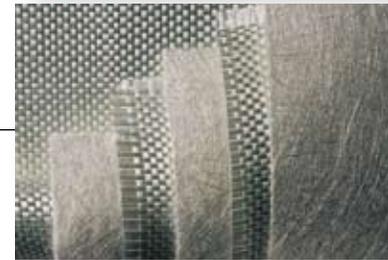

NAVY/CITRON YELLOW THREE COLOR CUSTOM  
WITH UPPER DECK STRIPE, MODEL 262

# Beyond ROBOTS

A single, hyphenated word, “hand-laid,” subsumes the aesthetics, the obvious muscle of Cobalt fiberglass. Fiberglass of Cobalt quality demands continuing individual effort and close attention to detail in a manufacturing process that requires the human touch. The fabrication of fiberglass is a process that too often leads to misplaced attempts at automation. But not at Cobalt, where the average experience-level of lead associates in the Fiberglass Department is ten years. Associates with knowledgeable hands. With eyes that have seen it all. With personal standards of workmanship that no automated process could hope to match. Certainly, robots have their place, and we make good use of their accuracy and consistency elsewhere in our Neodesha facilities. But not in the creation of Cobalt fiberglass. Not ever.

*“I enjoy seeing projects through to completion, no matter how big or small. I understand that when I do my job well, I’m contributing*

*directly to a Cobalt owner’s enjoyment of his boat. If the way I do my job makes me happy, the owner is going to be happy too.*

*Ivan Smith,  
34 years at Cobalt  
Fiberglass Finish*

## ASSURANCES

From analysis of all raw materials entering our Neodesha facilities to careful monitoring of cure times, Statistical Process Control (SPC) calibrates the entire lamination process. Cobalt quality-assurance looks at ratios of glass to resin, for correct pressures on spray equipment, at resin temperatures and catalyst percentages. Here is fiberglass that has stood up to some scrutiny.

## MULTIPLE LAYERS

The Cobalt hull lamination schedule calls for eight layers of fiberglass mat and woven roving -- each hand-laid, of course -- with overlapping double thickness at the keel, a total of 16 layers to guarantee integrity and fight fatigue throughout the structure.

## STRUCTURAL REINFORCEMENT

In the Cobalt process, chemicals and composites make strong fiberglass stronger still. Epoxy-modified resin in the skin coat and 100% polyester resin in the structural resins add toughness, tensile elongation, and flexural strength while decreasing heat distortion. Kevlar does its part too, maximizing strength and minimizing weight, dampening vibration, ensuring durability through years of enjoyment. A space-age product called Spraycor pays triple benefits: less weight, enhanced stiffness in the hull sides, and an extra-quiet ride, those annoying water-slaps muted.

## NIDA-CORE FLOOR

There are simply no soft spots in the floors of Cobalt boats. Where too many competitors are content to use wood in the floor, Cobalt demands Nida-Core, a NASA-developed honeycomb synthetic that has proven its superiority to plywood or balsa. No rotting. No deterioration. No give to a linebacker’s footfall.

## FINISH

Think easy reparability, perfect clarity, high-gloss buffback, and the absence of cracks, crazing, air voids, and blisters: Cobalt gelcoat mirrors the worth and inclusiveness of the two-year warranty supporting it. The boat’s graphics nest in the gelcoat itself -- no tape to split or peel. Just below stands the Xycon, another Cobalt exclusive, an extra layer of protection between the fiberglass and the gelcoat to reject water and print-through, to ratchet the gloss up a notch or two.

# Beyond THE DANCE

Sunlight skips on water. In a noontime cove, in a technicolor dusk, the sun simply cannot stand still. And nothing on a Cobalt repeats the sun's day long dance like the shining steel of the cleats and the windshield and the unbending arms of a bimini top. Stainless has long been the Cobalt structural material of choice; its clean and simple lines, its hero's strength have made it the ideal material for eye-popping design and superior functionality. We're now bending all our steel in-house, in suburban Neodesha, ensuring dead-on accuracy and matchless strength.

Cobalt engineers mix metals in the hardware specifications of our boats. Aluminum plays its part, bringing along structural strength while minimizing weight. And where other manufacturers might settle for store-bought plastic, Cobalt knows that handcrafted metal -- some heavy, some light -- is the only way to waltz.

*"I drive a forklift out back. I've worked just about everywhere in this plant, and every morning I come to work among my buddies. I believe that one of the main reasons our boats have maintained such high quality over the years is that we're all friends here. We work well with each other. We like being around each other, and it shows in the boats we build."*

*Carl Shaw  
25 years at Cobalt  
Fork-Lift Operator*

## BACKING PLATES AND STRUCTURAL STEEL

From the beginning in 1970, backing plates have been a foundation of Cobalt design, anchoring every mounting point for hardware, from the entire windshield base to the side-rails to the seat pedestals to the swim ladder. Wherever exterior hardware adjoins the fiberglass, an aluminum plate lies embedded just below, tapped through bolted fasteners. The retractable ski tows mount to structural steel supports for a largish wildman at full, flat-out speed.

## STAINLESS STEEL FITTINGS

In all through-hull fittings, Cobalt insists on electrochemically polished stainless steel. Same for most hinges that populate a Cobalt stem to stern -- and tie-downs and latches, especially at such critical points as a windshield hold-down.

## STAINLESS STEEL ARMOR

Cobalt was the first manufacturer to build into every boat a bow scuff plate, a heavy-gauge bodyguard of the gelcoat during trailering. Meantime, rubrails are as strong as they are shiny, solid stainless steel protection from dock abrasion.

## CANVAS SUPPORTS

100% stainless steel gives form and support to Cobalt bimini tops, adding rigidity and quiet strength to frames and fittings and diagonal sway bars extending all the way to the deck. Forward supports are not simply held down with fabric strips but secured by stainless steel turnbuckle bimini support poles.

## ENGINE VENTS

Stainless on some Cobalt models, aluminum on others. But never plastic. Not ever.

# Beyond FUNCTIONALITY

The Cobalt helm station is all about control. Crisp, firm control. No nonsense. No misplaced gauges or gadgets. Designed and built for captains who know exactly where they're going, whether for a Saturday's cruise to a lakeside lunch or a hard reach toward Pensacola with a thunderstorm suddenly astern. Aeronautical in its configuration, the Cobalt helm melds form and function in a fingertip presentation of operating information and operational response, monitoring the boat's performance minute-to-minute, harnessing its power and agility in smooth, easy adjustments of wheel and throttle. And all this control rides in a setting at once elegant and accessible, beautiful to behold, welcoming, ready to go.

## UPHOLSTERED DASH

Cobalt dashes are always upholstered, rich to the eye, reassuring to the touch. Hand-fitted, of course. Gloveboxes are large, often padded, with sculpted trays for safe storage.

## STEERING WHEEL

Perhaps no other element of these boats' design speaks more eloquently of The Cobalt Way than does the steering wheel. Wrapped in imported Italian leather for unmistakable feel and heft, the Cobalt wheel turns true and sure, tilts to any angle of choice.

## PANELS

Cobalt demands the same integrity of construction for the helm as for other structural fiberglass components. There will be no plastic to be found in Cobalt dash panels: metals only, for proven strength and long, durable life beneath brilliant baked-on finishes and the deep, natural beauty of exotic woods.

## ELECTRICAL COMPONENTS

Cobalt electrical systems have been designed with the foreknowledge that the majority of on-the-water failures originate among wires and connectors. Built for extreme reliability, these systems employ double circuit breakers for full, certain protection. Competitors' electrical schemes settle for automotive fuses -- difficult to access and change -- but Cobalt's marine breakers can be reset with a simple push of a button. Waterproof machine applied connectors complete the circuit.

## INSTRUMENTATION

Cobalt gauges inform the captain immediately and accurately. Naturally, they're illuminated and weather-resistant, with maximized legibility. Lenses are scratch-resistant glass, never plastic.

*"I install switches and gauges in various dash panels. And, if I have anything to say about it, 20 perfect panels a day. Because flaws in the electrical system can cause so many headaches on the water, we take extra care in our testing. If there's a potential problem, we're going to find it right here."*

*Anita Claus,  
20 years at Cobalt,  
Component Assembly*

# Beyond FIRST IMPRESSIONS

Walk the aisles of any boat show and expect to be impressed. In the warm, dry, artificially lit ambience of an arena, every boat on the floor will claim to be quite the supermodel. One boat's interior will mimic another's in its skin-deep beauty, in its three minutes of rest for a briefly seated browser. Cobalt does not build boats for boat shows. Our interiors have been designed, their raw materials spec'd, for years of looking good and working well under hard, hard use. A cursory glance at a Cobalt interior will turn heads, of course, but its true and lasting value can be appreciated only over time. In entire families made comfortable on a run to a bayside dinner. In teenagers whooping at the end of ski ropes. In a ton of kids' toys stored easily and safely. In old love songs made new again. Amid fabrics and leathers and carpets that feel just like home. Reserve judgment on your new Cobalt's interior. We'll talk in 2010.

*"I enjoy the interaction with the girls in my department. They do just excellent work. With 13 different Cobalt models, it keeps us hopping to stay ahead of the line, but we're not going to cut any corners. We're going to have straight, even seams and perfect fits -- no matter what. We're all women in this department, and we take a great deal of pride in our work."*

*Dee Caldwell  
28 years at Cobalt  
Lead Associate in Upholstery*

## MATERIALS

Here are the virtues of Cobalt vinyl: hand-stitched, stain-resistant with impregnated colors, and warranted beyond anyone's ability to sit. New this model year: a vinyl exclusive to Cobalt that, eyes shut, could be animal skin, such is its depth and texture. Look too for cabin fabrics that say "penthouse" all the way.

## SEATING

At the helm, the traditional flip-lip now refined into a seat that lifts straight up, articulates, and slides into firm, supportive position above the windshield for boating in the breeze. On seats, composite construction with dri-fast foam for immediate pass-through of water. All upholstery, wraparound and double-fastened with glue and stainless-steel staples.

## STORAGE

Cobalt storage is compartmentalized, cavernous, and everywhere, finished to the same standard as the boat's open, public spaces. Ski lockers are large and lockable, rubber-matted, with gas-assist cylinders for effortless opening and closing.

## SOUND SYSTEMS

Six, not four, six Sony marine-grade speakers come standard on Cobalts, ready to rock with all-around, deep-down sound at the edge of an ocean. And greatest hits at those fingertips: remote controls, at the dash and the swim platform are standard, as is an iPod™/MP3 port. Options involve power amps and directional speakers and subwoofers that will thump a shark three fathoms below.

## CARPET

Tough love underfoot in every Cobalt, in carpet that snaps-in after easy cleaning, with rubber backing naturally and, beneath, non-skid surfaces in all carpeted areas of the boat. Consider the Rivulet carpet option, a pattern introduced last year that's become a very popular up-scale look.

# Beyond LEGAL DOCUMENTS

Promises should never be spoken in small print. Guarantees ought to shout right out loud what, finally, they stand for. Fact is, no New York city law firm could ever write a contract more honor-bound than a handshake between Pack St. Clair and an honest man about to become a Cobalt dealer. As Cobalt has grown, longer and more formal sorts of contracts have taken their inevitable, maybe their appropriate place in the general scheme of things agreed-to-around-here. The general spirit of the place persists, though: Cobalt people will do exactly what they promise to do. On a handshake. On a long look in the eye.

Such promises occur because Cobalt people know Cobalt boats. Pushed, prodded, picked apart at every stage of their design and manufacture, these boats have been tried and tested in a way that new owners might never imagine, most surely might never find necessary. Take the helm. Live your new life. Leave the fine print behind.

*"I don't mean to boast, but quality control starts right here, with the raw materials that will eventually become a Cobalt. Only when I determine that incoming materials meet our specifications are those materials released to production. It's a big responsibility, I suppose. But I wouldn't have it any other way."*

*Tony Fuller,  
20 years at Cobalt,  
Quality Assurance Specialist*

## TEN YEAR PROTECTION

**Hull & Deck Structure:** Floors, stringers, bulkheads, motor mounts, transom, all deck and hull joints

## FIVE YEAR PROTECTION

- Engine:** Internally lubricated parts
- Stern Drive:** Internally lubricated parts in upper and lower housings
- Intermediate Housing:** Shaft, U-Joints, bearings
- Steering:** Helm, rack, cable, pump, seals and gaskets
- Power Trim:** Pump, cylinders, solenoids, switches, seals and gaskets
- Electrical:** Alternator, voltage regulator, electronic ignition module, ignition coil, starter motor, wiper motor, engine wiring harness, courtesy lights, docking lights, battery switch, battery isolator, bow light, horn, anchor light, spotlight, blower motor, electric hatch motor and switch
- Fuel Delivery:** Fuel injection control units and injectors, fuel injection pump, fuel injector rails, fuel delivery pump, flame arrestor
- Controls:** Control box, neutral safety switch, cables
- Instrumentation:** Tachometer, oil pressure, volt gauge, hour meter, speedometer, temperature, trim gauge, fuel gauge, oil temp, water pressure, synch gauge
- Accessories:** Air conditioner, cockpit heater, air/water temperature gauge, engine battery charger, compass, depth finder, transducer and wiring harness, generator, refrigerator, galley sink and faucet, shore power, stainless steel deck railings, stainless steel rubrail, stainless steel hardware, stereo/CD player, CD changer, stereo remote, trim tabs, waste system, water system, stove, microwave, windlass
- Electronics:** Radar, GPS, VHF Radio
- Non-Defect Failures:** Overheating, pre-ignition, detonation, scored pistons, tuliped valves, carbonized rings, heat collapsed rings, burnt valves, bent valves, warped heads, heat cracked heads and block (excludes freezing), thermostat failures, sensor failures
- Additional Benefits:** Choice of towing, dockside assistance, hoist and lift out or pick up and delivery. Taxes, shop supplies, lubricants, coolants, filters, spark plugs, hoses, clamps, belts, engine tuning, and lake/sea trial when necessary for a covered repair.

## TWO YEAR PROTECTION

- Gelcoat Finish:** Protection from crazing, stress cracks, air voids or blisters
- Upholstery:** Protection from defective materials or workmanship
- Other Components:** Steering wheel, seat mechanisms, hinges, ladders, etc.
- Canvas:** All Sunbrella® canvas

## ONE YEAR PROTECTION

- Components:** Fuel tank, automatic fire extinguisher, windshield

See written warranties for specific coverage. Sunbrella® is a registered trademark of the Glen Raven Mills Company.

# Beyond HAPPY MEDIUMS

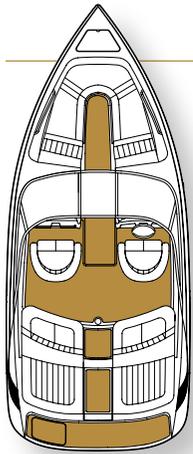

THE 200 ENJOYS BEING EXTREME.

# 200

Insistent in going way, way beyond “entry level,” the Cobalt 200 packs more luxury, convenience, and comfort into its 20’4” than some boats twice its size. Cobalt design has never cut corners, for the sake of neither pricing nor faster production schedules. And so the 200 is the salt of the sea, all things to all people, but in an outrageous sort of way. It delivers fuel economy in the company of raw horsepower. It sets tight, quick turns in counterpoint to a smooth, smooth ride. It makes possible spacious walkabout and stretchout room and ample storage in the smallest Cobalt. It embraces tomorrow’s technology amid yesterday’s standards of hand-craftsmanship. As a result, knowledgeable boaters have recognized in the 200 one of the truly spectacular values in the industry. Value on your first weekend on the water, value on the tenth anniversary of that perfect Saturday, value on the day you decide it’s time for a bigger Cobalt. Step aboard the 200. Set a course for exactly where you want to be and, in the whoosh of a perfect wake, watch mediocrity fall far, far behind.

# Beyond PLAN B

THE 220 IS SO MUCH MORE THAN A VARIATION ON A THEME.

# 220

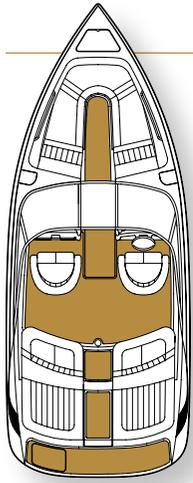

They come and they go, these 22-footers. Attempting to be all things to all boaters, they grey and they blur. Until now. Until the 2006 incarnation of a Cobalt design that, from its earliest days on the drawing board, intended to be so much more than just an alternative. Absurdly unconventional in its elegance, too-big-for-its-britches in its insistence on standard and optional features that . . . historically . . . have never applied in a craft of this size, hep to every opportunity for a good time in the next cove over, the 220 cruises all alone. Extending lucky owners' notions of what might be. Showing off in silent suggestion of what style really means. Easing into an unforgettable weekend with friends and family all around -- boarding and diving and championship skiing just ahead -- but for now, sumptuous fabrics and vinyls, a helm station dressed in rosewood, chin-soft gunwale padding, and sculpted lounges and reclining backrests and a sunpad on which to rest and build some dreams. Make some plans. For a quick Friday getaway maybe. Or, as the alternative comes round, a getaway life. The 220 knows the way.

# Beyond ADMIRING GLANCES

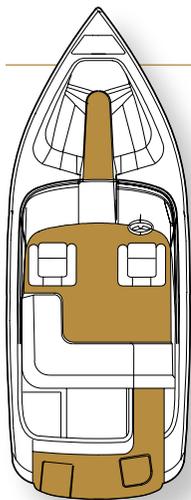

THE 226 DEALS ONLY IN SERIOUS,  
VERY SERIOUS LONG-TERM RELATIONSHIPS.

# 226

Oh, it's tempting alright, this tendency to appreciate a boat for the immediately obvious -- for its matinee-idol appearance, or its heart-thumping power, or the comfort and expanse of an interior designed around the fine art of entertaining. But the 226 has so much more to offer an owner who comes to know every square inch of real estate in a boat built for the long, long haul. The 226 asserts its full value only over time, only in the ongoing use of standard and well-chosen optional features that match closely your favorite, your recurrent activities on the water, both at speed and at anchor. As, for the thousandth time, you remark the 226's ubiquitous storage, the firm and accessible control at its helm, the sweep and deep-down support of its contoured bow seating, the thought comes again: this really is the boat for me and my family. A ride that's solid and enjoyable, even in the tightest turns, amenities that answer every need (a concealed port-side ladder for swimmers or an optional dinette table, for example), and a warranty that guarantees all the above . . . here are the true and lasting reasons to love a boat. Till death, or a bigger Cobalt, do you part.

# Beyond CLASSICISM

COBALT TRADITION MEETS COBALT INNOVATION.  
HERE COMES THE 232.

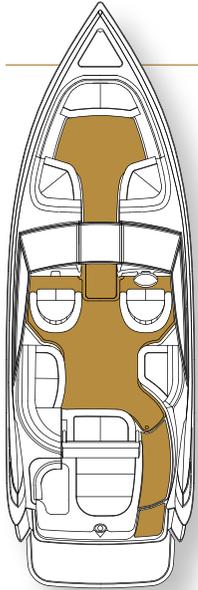

# 232

The newest Cobalt underscores the old. In its styling, in its attention to meticulous detail, in its maximized use of every last cubic inch of space, the 232 quietly celebrates traditional Cobalt virtues. In subtle ways -- the perfect double-stitching of the upholstery or the clean functionality of the instrumentation -- the 232 makes the case for classic touches done extremely well. At the same time the 232 explores new territory, most obviously at the stern where the cockpit has been extended a full 18 inches, over the motor box, where the seat bottom matches up to the sunpad in a fun-drenched acreage. The 232 sets up high afloat, but her profile remains sleek and fast. Nothing boxy here, with an aggressive rake to the flat European windshield. Nothing new in Cobalt's extravagant use of heavy stainless steel. And nothing stingy in this boat's apportionment of room, room, and more room for storage and seating. The seats are a study in old and new themselves, with double-density foams for more solid comfort and an innovative five-degree tilt for improved weight distribution. So walk through your 232, run your hand over the textures of its fit and finish, smile, and know that you stand in the best of all possible worlds, half-way between yesterday and tomorrow.

# Beyond FIRST IMPRESSIONS

A CASUAL GLANCE SAYS THE 240 IS HANDSOME.  
BUT LOOKS ARE JUST THE BEGINNING.

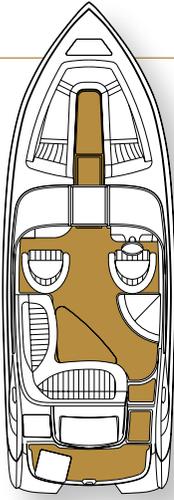

# 240

*B*uy the 240, if you wish, for its dashing good looks, for the sweep and contour of its Mediterranean lines. It's perfectly acceptable to own this boat just for the stares that will follow you all day long. But, like all Cobalts, the 240 values enduring substance over fleeting style, and the 240's true worth emerges only after days and weeks in its company. The convenience and roominess of the cockpit, for example, become fully clear only after an onboard mini-family-reunion. The flow of traffic from spacious bow seating to hyper-efficient swim platform is easy and unimpeded, as a thousand quick dips in a summer's stash of coves will demonstrate. The platform itself is easily accessed from the water, huge in its capacity for both on-site storage and beach-like sunning. The lobby-sized lounge and the captain's chairs support and comfort from first touch, of course, but a full day on the water confirms the added value of Cobalt standards for seat construction and upholstery materials. And more active passengers will soon enough come to appreciate the 240's way with wakes, thanks to reversed chines and the exceptional stability and control that result, especially in turns. So ooh and aah over the 240 all you want. Its deep and true self will be along later.

# Beyond EASY DEFINITIONS

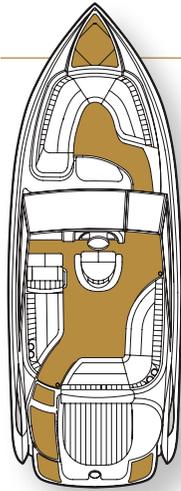

THE 24SX: DECKBOAT OR NO? YOU DECIDE.

# 24SX

For now we're not saying. Whether the 24SX is more the deckboat or the runabout. More inherently useful across season after season of reliable performance or more about hour-to-hour fun in the company of friends who haven't given one thought to the next business day. More about reversible seats that feel just like backrubs or about aft-aimed speakers in the bow that put your guitar-guy in concert at a moment's notice. And so which is it? A deep-V hull or a vast and sweeping swim platform? A raked European windshield or the wider cockpit it makes possible? A spacious, airy changing room with an optional Porta-Potti or an ultra-elegant center console set next to a high-traffic, starboard passage where all the right people are walking through. An optional wakeboard tower or an optional bow-entry ladder stowed neatly with the anchor. Decisions, alright. But you honestly can't go wrong in giving your family the 24SX. We know this boat as if we invented it, and there is but one way to proceed here: describe to your local Cobalt dealer your wishes for a boat of consequence and heft. And throw away your dictionary.

# Beyond FOCUS GROUPS

LISTEN TO PUBLIC OPINION.  
KNOWLEDGEABLE PUBLIC OPINION.

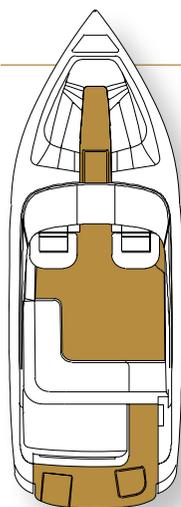

# 246

Across 35 years in the boating industry we've learned much here in Neodesha. From our own research-and-development, of course, but also from our dealers and our customers. Hence the 246: designed and built to answer the needs and wishes of those who know boats best, our Cobalt owners. At once roomy and intimate, functional but oh so easy on the eyes, with all sorts of choices in the powertrain to match horsepower to intended boating uses, and options - - ski towers and subwoofers and custom graphics and wakeboarding cruise controls -- that will make any 246 peculiarly one's own. Protected by the strongest, most comprehensive warranty in the industry, the 246 incorporates all the traditional Cobalt standards of construction, standards that no fads, no passing trends will ever replace. And so find your own reasons for owning the 246. The waiting fun of the swim platform maybe. The grace and good looks of an interior that feels like a 50-knot living room. Or the adrenalinized rush of a big block bringing your new boat on plane. Take your time. Decide exactly why the 246 is the boat for you. Meanwhile, you could ask your best friend.

SHOWBOAT  
BRANSON BOATS

# Beyond FANFARE

THE 250 ARRIVED THREE YEARS AGO TO ENTHUSIASTIC REVIEWS.  
AND NOW WE'RE HEARING ECHOES.

# 250

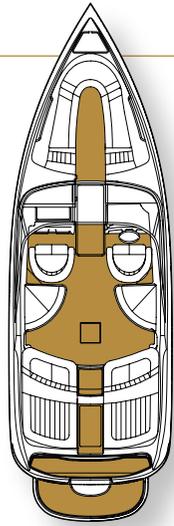

Boaters worldwide took notice when the 250 and its sister ship, the 255, burst out of the marina, ready to take on the nautical world with a deluxe set of carefully defined amenities, a long list of optional niceties, and a layout meant to be universal in its appeal to families with time together on their minds. Market response to the 250 has been remarkable, and we ask again the reasons why. How about custom combinations of gelcoat and stripe colors, bringing a new degree of personalization to Cobalt ownership? Or maybe this boat's obvious popularity arises from a hotel-sized head compartment and storage, storage everywhere, everywhere. Or a swim platform with three distinct levels of accessibility, convenience, and happy salt-tinged times. Or the 250's genetic ability to blend the running and jumping of a 20-footer with the laid-back elegance of a 30-footer. In any case, the 250 is back in full force this year with its systems refined, its basic design validated. In the meantime, we've all heard the hard-headed practical reasons for owning a 250, a time in which the early reports of greatness have been proven on umpteen-hundred ideal weekends.

# Beyond THE NEXT FIVE MINUTES

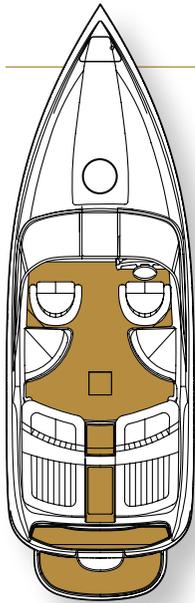

EVERY WELL-MADE BOAT HAS ITS MOMENTS. DAY IN, DAY OUT, THE 255 IS A HIGH-ENERGY, HIGH-STYLE BOAT FOR THE AGES.

Let's not be hasty here. Let's pay all due attention to the performance and efficiency of the Cobalt 255, to the details of its comfort and convenience. We can easily recount the dozens of up-front reasons to haul a 255 on toward home, that many of those reasons are based in research and hard, hard science -- the boat's insistence on quiet, gas-conscious cruising, for example, or its landlordly demand that all interior space be used very, very well. And then, after years and years of enjoyment, there's the 255's rich resale value down the line. The ultimate rationale for owning a 255 comes in more personal terms though. Terms at once hard-headed and sentimental, terms both practical and wild-eyed in their belief that every day ought to be Saturday. Here are the facts: the Cobalt 255 gives you a cabin with an unmistakable sense of access and luxury; the Cobalt 255 gives you every choice for personal expression: fabrics, colors, powertrains, a long list of options; the Cobalt 255 gives you every excuse for taking the day off. So experience to the hilt the exhilaration that this remarkable boat can generate minute-to-minute on an athletic summer morning. Just remember that your new 255 is going to be with you for a long, long time.

# Beyond TIME ZONES

SAVE ALL THE DAYLIGHT YOU CAN. IT'S THE 262.

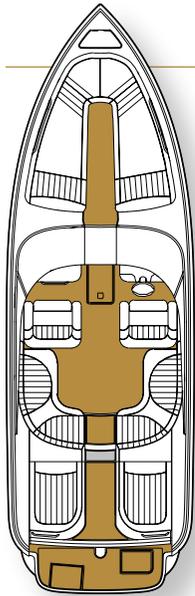

# 262

Some boats operate in a parallel universe of sorts, where sun and friendship and salted breezes become the whole wide world. Boats such as the Cobalt 262, a time traveler fully capable of turning the dreariest Monday into a TGIF of party-school proportions. The yacht-certified 262 is a standing invitation to suspend -- suspend worry, suspend work, suspend cell phones. Surrounded by the spaciousness of a cockpit built around a wraparound lounge and a double-wide flip-lip helm seat accommodating four adults across, you captain the 262 with an inevitable sense of possibility. With follow-through performance guaranteed by high-horse, high-efficiency MerCruisers or Volvo Pentas, with tight handling and responsive control assured by Cobalt's historic extended running surface and the 262's reversed chines, you understand that just ahead lies the best day in a long, long time. As the unbending details of Cobalt construction suggest the 262's longevity, its ongoing ability to produce many more such days. The options list for the 262 -- from a stainless steel arch to a swim platform in teak to a cockpit heater -- completes the notion that time is what you make of it. Own the 262. Give your watch to a grandchild.

COBALT

COBALT

# Beyond HEARTTHROB

CLOSE YOUR EYES. IT'S TIME FOR SOME PRACTICALITY.

# 263

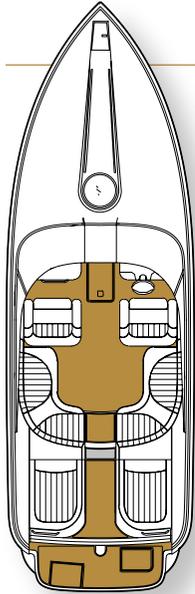

Cobalt has never been opposed to unbridled physical attraction. As a matter of fact, we like nothing better than hearing our boats referred to as “a hunk” or, variously, “a real babe.” But the true and lasting reasons for owning a Cobalt go much deeper than classic profiles and eye-popping colors and textures. The 263 is a looker alright, positively Venetian in its lines. Its rationale for lasting love, however, lies elsewhere. In the smart detail of a cedar-lined locker perhaps. Or in the large cabin settee sweeping around the bow, with filler cushions stored in the sidewalls for easy replacement of the center table. Or in the efficiency and ease of use of the lower galley with its sink and single-burner stove. Or in the cleverly concealed Porta Potti. Or in the integration of the activity platform, with its handy wet locker, into the 263’s entire floorplan. Less obviously, there’s the extra headroom in the cabin, the sense of spaciousness that seems to be everywhere, in the cockpit for sure with its welcoming wrap-around lounge, or at the helm with its double-wide seating set next to a widened walkway. So 263, how do we love thee? Completely, practically, and deeply. Very, very deeply.

COBALT

# Beyond THE HORIZON

WHERE EARTH MEETS SKY THE 272 BEGINS SOMETHING  
VERY, VERY NEW.

# 272

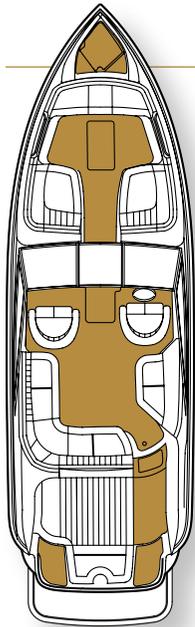

In another time, a farther place, the 272 suggests that four decades of boat-building have built something lasting. Because the 272 is first, last, and always a Cobalt, it roars into Friday afternoon with familial, fundamental strengths of construction that have underpinned every Cobalt ever built. Traditional virtues that sometimes disappear among the innovation and the technology that, quite rightly, surround a new boat. Even as Cobalt engineers sought to extend the envelope of what's possible in a 27-footer, they knew that traditional Cobalt standards of safety, performance, and structural integrity would never, ever be compromised. Always, across decades of models introduced after models introduced, the core of a Cobalt has never changed.

And so, the 272. Spacious. Carefully integrated. Luxurious and athletic and proud, but oh so practical and efficient. And safe. Designed for expanse and comfort and easy accessibility. Warm and easy in its elegance. Made for hours alone with all that matters. Rarefied hours. Hours that lie just over a welcoming horizon.

# Beyond HOME THEATER

THE 282: FAMILY ENTERTAINMENT, NO SPECIAL EFFECTS REQUIRED.

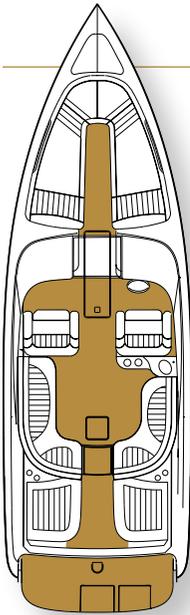

# 282

Picture this: a favorite bay, an endless sky Edenic in its color and clarity, quiet conversation and easy laughter punctuated by the shrill of children lost in fun that can happen only in and around water. At center stage, the Cobalt 282. Again this year recognized by the marine media and boaters-in-the-know everywhere as the pre-eminent bowrider in the runabout class, the 282 somehow manages to pull off the high-octane stunts of smaller boats while bringing along Hollywoodesque style and spaciousness. Lavish in its distribution of amenities, from optional 10-disc CD changers with surround-sound speakers and subwoofers to double-wide helm seating, the 282 packages the good times around solid, solid Cobalt construction and thoughtful design that says red-carpet all the way. The performance options on the 282 stretch from the massive to the atomic, all the way to twin 320 horses from either Volvo Penta or Mercruiser powerplants. The 282 deals in megaplex sorts of room, for storage, for entertaining, for stretching out and living the good life day to day. A big-time producer, the Cobalt 282 invites every kid-at-heart to star in an action adventure of high-speed thrills that will turn, sometime soon, into a genuine love story.

NAVY/SANDSTONE THREE COLOR CUSTOM

# Beyond ELOQUENCE

THE 323 IS ELEGANT AND IMAGINATIVE.  
IN A DIRECT AND PLAINSPOKEN WAY.

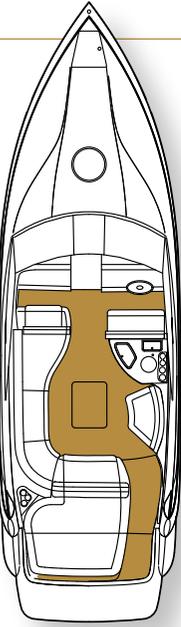

# 323

First and most of all, the 323 speaks of space and its ingenious. In the 323's cabin with its huge U-shaped lounge, the seating and sleeping are accommodating and comfortable, the head and shower inviting, the galley welcoming and accessible. In the cockpit, a flip-out table hides in the portside sidewall, ready to swing with just a touch out and up for a quick bite to eat. At the entrance to the cabin opposite the centerline door, a handy stainless ladder slides in-and-out for quick access to the bow. The cockpit galley finds room for a fridge in addition to the stove and sink. At the helm, seating is flexible and comfortable, ready to add more room as the back rests flop forward for a friend to sit nearby. Sternward, the cockpit seating links with the sunpad for ideal use of space there. But the 323 also speaks to boaters' sense of style. The 323's first owners will find new fabrics and textures throughout the boat as elegant as they are durable. And there is stainless steel absolutely everywhere on the 323, from the windlass plate to the optional and very aggressive arch to the heavy, stamped engine vents. A stylized wing protects skier-directed speakers above the extended swim platform. The 323 then: functional, architecturally refined, mature in its design. Enough said.

# Beyond THE LAWS OF PHYSICS

THE 343 IS A ROCKET, AN INTERCOASTAL MISSILE WITH THE HANDLING CHARACTERISTICS OF A HAMMOCK.

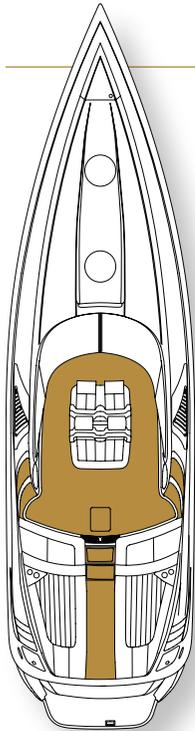

# 343

Easy and relaxed in turns at full speed, sleepy soft in rough water, the 343 contradicts conventional wisdom. It seems that an exceptionally fast boat can also deliver maximized stability, guaranteed safety, fingertip control, and comfort stem to stern. The secret? A stepped hull, whose performance was computed, tested, and refined a hundred times before ever it touched a wavelet. As indeed was the entire vessel -- all variables in the 343's design were calculated across five full years of Cobalt R&D, with particular brainpower set against the hull's supporting cast: the reversed chines and full-length keel pad for better tracking, a notched transom for less drag at the outdrive, the pillow-soft ride of a 24.5 degree deadrise and, of course, Cobalt's extended running surface -- a marvel of seamanship simply not found on other stepped hulls. And beyond all the science lie the by-now expectables of Cobalt specification. Luxurious fabrics. Hand-crafted fit and finish in cockpit and cabin. The mathematical classicism of the boat's lines. All amid some firsts in a 34-footer: a walk-around windshield and an amidships helm station with Livorsi instrumentation and Garmin GPS, standard. Isaac Newton suggested that what goes up must come down. Mr. Newton did not know the Cobalt 343.

# Beyond ATTITUDE

THIS YEAR'S CHOICES IN CANVAS, CONVENIENCES, AND CREATURE COMFORTS ARE BOTH PRACTICAL AND AESTHETICALLY PLEASING.

1

2

Color matched and hand fitted, Cobalt bimini tops, enclosures and tonneau covers are made of Sunbrella® acrylic marine canvas. Sunbrella® is extremely strong, highly water repellent, and yet it breathes, so it resists rot and mildew.

1. Bimini Enclosure Package - For complete enclosure of cockpit from the elements.

2. Bimini Top - Provides protection from the sun with ample headroom to stand.

3. Stainless Steel Arch Bimini Top - Extends fore and aft of the stainless steel arch. Will stow folded to arch.

4. Mooring Cover - Sharkskin™ material is ideal for long term storage.

5. Ski Tower Bimini Top - For use with Ski Towers. Will stow folded to tower.

6. Tonneau Covers - Bow and cockpit covers shown. Not recommended for long term storage.

3

4

5

6

## THEY ARE ALSO A WORKABLE EXPRESSION OF PERSONALITY.

A wide range of options are available to create a Cobalt uniquely yours. Consult your dealer for a complete selection to fit your needs. Some available options include:

1. Stainless Steel Foot Tread - A solid stainless steel plate with protruding rubber grips at the foot rest of the helm station.

2. Wakeboard Pro Cruise Control - Perfectly maintain a constant speed while towing skiers and wakeboarders

3. Stainless Steel Ski Tower - Elevates ski tow to give an upward pull.

4. Flag Pole - A Stainless pole locks securely into a stainless deck fitting, and is easily removable. Includes one U.S. flag and one Cobalt flag.

5. Stainless Steel Arch - Large gauge stainless tubing for the big water look and function.

6. Docking Lights - Stainless steel fixtures positioned for safe forward illumination while docking at night. Not for use while underway at speed.

# Beyond APPLAUSE

THE PAST YEAR HAS SEEN WIDE RECOGNITION COME COBALT'S WAY.

For the fourth time in a row, Cobalt has earned the J.D. Power and Associates Award for Highest Customer Satisfaction in Large Runabouts (20 to 29 feet). Also in 2005, Cobalt has been honored as a recipient of the Marine Industry CSI Award for achieving a high level of customer satisfaction in the product categories of Sterndrive Bowrider Boats and Sterndrive Cuddy and Express Boats as well as earning certifications from both Mercury and Volvo Penta for installation quality of their motors guaranteeing safety, reliability, and optimum performance. Long before the NMMA (National Marine Manufacturer's Association) certification was considered mandatory, Cobalt met the U.S. Coast Guard and ABYC (American Boat and Yacht Council) requirements year after year demonstrating Cobalt's commitment to boating safety and a quality consumer experience. We could not be more honored with these awards, arriving as they do with documented evidence of the imagination, craftsmanship, value and customer satisfaction we strive to provide with every Cobalt.

That said.

Several times a day, we find as much personal and corporate reward as any boatbuilder ought ever to ask. As each brand new Cobalt rolls out the big doors in the far southwest corner of our plant in Neodesha, we see a happy owner waiting with family and friends, a good person with just two words to say.

Our two words too.

"Thank you."

Excellent Customer Satisfaction

J.D. Power and Associates 2001-2003, 2005 Boat Competitive Information StudiesSM. 2005 Study based on responses from a total of 12,530 owners of 2003 and 2004 model year boats registered between March 1, 2003 and May 31, 2004. Includes fiberglass family runabouts from 20 to 29 feet with open or closed bows, mostly sterndrive, some outboard power. [www.jdpower.com](http://www.jdpower.com)
